PRINCE KUMAR MISHRA

BTECH ECE / SOFTWARE INTERNSHIP

PYTHON / WEB / ROBOTICS

pm023847@gmail.com / +91 7838956795
New Delhi 110008 / github.com/mishra-prince

01 / PROFILE

First-year BTech ECE student at ADGIPS (GGSIPU), with intermediate Python and projects across web applications, automation and robotics. Seeking a software internship to contribute, learn and build useful tools.

02 / EDUCATION

BTech / ECE
ADGIPS, GGSIPU
First year

Class XII / 2025
DTEA Sr. Sec. School, New Delhi

Class X / 2023
DTEA Sr. Sec. School, New Delhi
Passed

03 / TOOLKIT

PROGRAMMING
Python (intermediate); C / C++ foundations

WEB AND DATA
JavaScript, TypeScript, React, FastAPI, Express, REST APIs, SQLite, SQLAlchemy, Qdrant

TOOLS AND HARDWARE
Git, GitHub, pytest, ESP32-C3, Arduino IDE, Wokwi, UDP / JSON

PRODUCTIVITY
Microsoft Office: Word, Excel, PowerPoint

04 / WORLD ROBOT OLYMPIAD

VOLUNTEER / JAN 2023

- Assisted with organizing robotics events and coordinating participants.
- Provided technical support, troubleshooting and guest guidance.
- Maintained event records and developed teamwork and leadership through coordination.

05 / CREDENTIALS

Rockwell Automation / Certification / 2023
WRO India / Future Innovators Senior / 2022
Zonal Level Science Exhibition / Transport and Innovation / 2022
National Science Olympiad / 2022

06 / BEYOND THE CODE

Chess; robotics, technology and innovation.
School competitions, hackathons and science fairs.
Analytical problem-solving, teamwork and leadership.
Communication, time management and adaptability.
English B2 / Hindi C2

PROJECT FLASHCARDS

< / >

SELECTED BUILDS / 2023-2026

BUILD_01 OPEN REPO >

SpendOath

Agent commerce demo

TypeScript / React / Express / SQLite

- Built a payment demo with server-enforced budgets, idempotent retries and SHA-256 delivery checks.
- Added result verification, audit receipts and 15 automated tests for budget, retry and integrity cases.

BUILD_02 OPEN REPO >

Hackathon Calendar

Discovery and deadline automation

Python / FastAPI / React / SQLite / Telegram

- Created four source adapters, normalized records and scheduled Telegram deadline reminders.
- Added change alerts, a calendar dashboard and tests for parsing, reminders and announcements.

BUILD_03 OPEN REPO >

SwasthyaVoice

Voice intake prototype

Python / FastAPI / React / Qdrant

- Built recoverable conversations, patient-history retrieval and a human-review dashboard.
- Separated urgency rules from LLM extraction; added 14 synthetic scenarios for memory, recovery and escalation.

BUILD_04 OPEN REPO >

ANT-X Micro

Robotics communication prototype

Python / Arduino C++ / ESP32-C3 / UDP

- Built a JSON protocol with 5 Hz telemetry, CSV logs and a robot emulator.
- Added contact-stop logic, packet validation and command expiry; documented staged hardware development.

05 / PASSENGER DETECTOR SYSTEM

MAY 2023

CIRCUIT & DESIGN DEVELOPER

- Designed the circuit and integrated electrical components to detect a passenger extending a hand or head outside a vehicle window.
- Integrated a driver alarm and seat-number display to identify the passenger; focused on hardware design and system integration for passenger safety.
